Alert to Special Education Directors – In-By-Three Results from SAIS

As most of you realize, the state is under tremendous pressure to increase the numbers of AzEIP-served children who are evaluated and have an initial IEP in place by their 3rd birthday. The ADE/ESS is supposed to be able to extract these numbers from SAIS, however the data have continued to be questionable. The chart below provides you with information about your district's SAIS-generated "In by 3" information.
